

Dean Karim

Warehouse Trainer & Operations Technologist

dkarim0204@gmail.com · Los Angeles, CA · github.com/dkarim02

SUMMARY

Operations professional with 4 years at Nordstrom bridging warehouse operations and technology. Built and deployed a browser-based reporting suite that reduced report generation time by 90% and recovered 1,170 annual hours of supervisor labor. Experienced in Manhattan Active WM, process automation, data pipeline design, and cross-department leadership.

KEY IMPACT

90%

Reduction in report generation time

1,170 hrs

Annual supervisor hours recovered

\$29K

Annual cost savings projected

EXPERIENCE

Warehouse Trainer & 2nd Shift Supervisor

Nordstrom · Distribution Center 499 · 2021 – Present

- Designed and deployed the DC499 Report Processor Suite — a 5-app browser-based reporting platform built in JavaScript/HTML that automates CSV processing from Manhattan Active WM, eliminating manual Excel filtering across all departments
- Reduced per-report time from 5 minutes to 30 seconds; recovered 1,170 annual supervisor hours across all departments (\$29K cost savings at \$25/hr)
- Built complex data pipeline features including transaction ID filtering, location zone-based dept attribution, cross-file deduplication, and real-time PPH goal projection
- Deployed automated Teams shift update notifications via Microsoft webhook, delivering formatted Adaptive Cards to leadership channel hourly
- Designed and ran a Power Automate Desktop loop that automates hourly MAWM CSV exports — fully unattended, runs the full shift on a dedicated machine
- Authored and presented A3 to senior leadership and HR documenting a value analysis (63% waste eliminated), ROI analysis, and four-phase deployment roadmap
- Manage a team of 25+ Ecom associates on 2nd shift, overseeing replenishment, putaway, picking, packing, shipping, and sorting operations
- Train new warehouse associates and supervisors on MAWM processes, SOPs, and operational workflows

PROJECTS

DC499 Report Processor Suite

dkarim02.github.io/DC499-reports · JavaScript, HTML, CSS, Chart.js, PapaParse, GitHub Pages

- 5-app suite covering Ecom, Reserve Stock, Item Prep, Receiving, and a cross-department dashboard
- Features: department-filtered leaderboards, hourly activity charts, associate performance drill-down, PPH goal projection, Teams webhook posting, Excel dashboard push

- No server, no backend, no IT infrastructure — pure browser-based, deployed on GitHub Pages

A3 — Automating Reporting Through Claude AI

Presented to Senior Leadership & HR · June 2026

- Formal A3 problem-solving document with value stream analysis, time/cost modeling, and strategic roadmap
- Quantified transformation from 63% non-value-added work to 75% value-added work

SKILLS

Technology

JavaScript · HTML · CSS · GitHub · Power Automate ·
Microsoft Graph API · Teams Adaptive Cards ·
Claude AI · Claude Code · CSV data processing

Operations

Manhattan Active WM (MAWM) · Warehouse
supervision · Associate training · Lean / A3
methodology · KPI & PPH tracking · Shift
management · Cross-dept coordination

EDUCATION

Ongoing professional development in software development and AI tooling

Applied learning through Claude AI, Claude Code, and real-world deployment of production tools
